Summary

Information Technology graduate (B.Tech, August 2026) with strong skills in Python, SQL, and machine learning. Completed a 7-month Data Science internship and delivered 3 end-to-end projects, including a live, deployed application. Eager to create efficient, insight-driven solutions.

Technical Skills

Programming Languages: Python, C, C++, Java, JavaScript, HTML, CSS
Frameworks & Libraries: Django, Streamlit, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Data Science & ML: Data Analysis, Preprocessing, Visualization, Machine Learning, Predictive Modeling
Databases: SQL, SQLite
Tools: Git, GitHub, Jupyter Notebook, VS Code
Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms

Experience

Data Science Intern – SoftPro India Nov 2025 – Jun 2026

- Cleaned and transformed real-world datasets with Pandas and NumPy over a 7-month internship, preparing them for analysis.
- Produced Matplotlib visualizations that surfaced trends and actionable insights for decision-making.
- Built and evaluated Scikit-learn models for prediction tasks.

Projects

AI-Powered Library Management System (Django) library-management-3yrc.onrender.com

- Built and deployed a full-stack application with Django, SQLite, HTML, CSS, JavaScript, and Bootstrap, securing access for 3 user roles: librarians, students, and teachers.
- Automated 5 core workflows: book issue/return, fine calculation, book requests, digital library cards, and member management.
- Added a recommendation engine that suggests books using 5 criteria: course, semester, department, batch, and availability.
- Designed a responsive dashboard with search, filtering, and catalog management.

House Price Prediction (Django) github.com/ratneshvandanatiwari21-boop/house_price_pred

- Created a price estimation tool with Python and Django.
- Trained models on real estate data using 4 key features: location, area, bedrooms, and amenities.
- Embedded the trained model in the application to return instant estimates from user input.

Disease Prediction System (Streamlit) github.com/ratneshvandanatiwari21-boop/disease_pred

- Implemented a Python application that forecasts diseases from healthcare data.
- Trained and evaluated predictive models on the collected dataset.
- Added an interactive Streamlit interface for entering inputs and viewing predictions instantly.

Education

Dr. Ram Manohar Lohia Avadh University (IET), Ayodhya Sept 2022 – Aug 2026
Bachelor of Technology (B.Tech) in Information Technology
Relevant Coursework: Data Structures & Algorithms, DBMS, Machine Learning, Artificial Intelligence, Python Programming

Ayodhya Academy – Class XII (CBSE Board), 65.2% 2022

Ayodhya Academy – Class X (CBSE Board), 83.7% 2020

Extracurricular Activities

Counting In-charge – Divya Deepotsav, Ayodhya 2023 – 2026

- Led a team of 400+ volunteers at a Guinness World Record event, counting and verifying 25 lakh+ (2.5 million+) diyas and delivering the official report.
